*\*\*\* To receive a lower value per acre, the lessee must submit an application for the long term dedicated agricultural (10 year) program. The dedication must be recorded and the lease remaining must be for a minimum of 10 years for the period the dedication is applicable.*

*The non dedicated agricultural program (referred to as NDA) has been repealed effective 1/1/2028. Per Hawai'i County Code 19-57, all properties in the NDA program will need a new agricultural program application between 9/2/2024 to 9/1/2025 in order to have a lower agricultural value for 1/1/2026. Due to the overwhelming number of applications expected, the Real Property Tax Division will have until 2027 to review these applications during which time the properties in the NDA program previously will maintain the NDA program value per acre as noted above as long as there is active agricultural use.*
